

Type -	Group
Development -	Five acres with sanitary and basic cooking facilities and open space for bedding or tents sufficient to accommodate not more than 50 persons for short periods of time.
Parking -	Minimum of 25 spaces
Type -	Family with tent or trailer
Development -	Four units per acre (unit consists of table, cooking facilities, space for tent or bedding and screening.)
Parking -	One car space for every unit

Camping and picnicking units should be at least 100 feet apart to preserve the forest cover and to provide privacy. A camping unit should consist of a platform or area for pitching a tent; tables and benches; and nearby water supply; cooking and sanitary facilities. Areas should be easily accessible to roads or trails. The terrain in site areas preferably should have a 10 percent slope but should not exceed 20 percent. Recommended also is the adoption of four persons per unit as the average capacity for all types of facilities. Minimum, maximum, and optimum density standards can be applied to camp and picnic units. At a capacity of four persons per unit, these units should be spaced no closer than 100 feet apart of five per acre in staggered arrangements in the forest areas and in more intensive areas no closer than 50 feet apart or 10 units per acre.

Scattered camp development is undesirable from the standpoint of aesthetics, economics in construction, and maintenance and administration. Scattered development hampers good forest and land management practices. Consequently, cluster standards have been devised to
